

Stephen, Gunars Ceksters and I were very pleased to be at the OEA gala last week and see Trans Canada win the 2015 OEA Company of the Year award.

I know the tradition of this award, and the winners over the years have been outstanding employers and leaders in the energy industry. Trans Canada's award continues this legacy.

I heard reference in the discussion to the on-going efforts by Trans Canada related to Energy East, and then full recognition of the exemplary work you are doing with First Nations. We also know this is not a single year's effort but has lasted, and will continue to last for a long period of time.

Congratulations from your friends at the Ontario Energy Network!

Well done.
